rajreddy23@outlook.com

github.com/rjrddy

Experience

L3Harris Technologies

Associate Software Engineer

Greenville, TX

June 2025 – Present

- Developed signal processing modules in Python and C++ on embedded systems.
- Built microservices for high-frequency data ingestion using Podman and serverless.

Doxy.me

Software Engineering Intern

Charleston, SC

August 2024 – May 2025

- Built transformer-based models with PyTorch and Llama, integrating WebRTC.
- Deployed inference pipelines on SageMaker & Fargate with reinforcement learning.
